

Universal insulation boards

 PAL

LINITHERM PAL

Ideal as flat roof insulation, under screed, insulating attic floors, terraces etc.

LINITHERM Universal insulation boards are ideally suited for insulating flat roofs (thermal surface protection of waterproofing is required typically), under screed and floor heating, insulation of attic floors, in radiator niches, ...

The PAL universal insulation board is pressure-resistant and coated with protective aluminium film on both sides. The boards achieve excellent insulation values (Thermal Conductivity Level TCL 023).
